PROJECTS

PETS PLEASE | REACT

I was tired of seeing social media posts by family and friends that were outrageous and dumb. Pet's Please is a single page application that allows users to save pictures of their pets to view on a main social media feed. Users can follow other users to see their pet pictures as well. You can tailor your experience by following good pet photographers and using the ability to filter by animal type. It makes for a great stress free social media app!

- Front end capstone project built in React using JSON server to store user and pet information
- Full CRUD functionality allows users to maintain pet info
- Photos stored using Cloudinary's image services

ABOUT ME

Coming from a digital marketing background, I knew that I really enjoyed being creative and problem solving more than generating clicks. My only experience with web development before Nashville Software School were some Wordpress sites I made for clients. When I was looking to change careers, I thought about being able to develop websites without any constraints and started looking into software development. It's been an exciting journey so far, and I can't wait for it to continue!

PROFESSIONAL EXPERIENCE

JUNIOR SOFTWARE DEVELOPER

NASHVILLE SOFTWARE SCHOOL | FEB 2020 - AUG 2020
Intensive full-time 6 month software development bootcamp focusing on full-stack (C#/.NET) development fundamentals and problem solving

- Build single page applications using HTML, CSS, Javascript, and React
- Create CRUD functional applications
- Source code version control with Git / Github

GROUP PROJECTS

HOLIDAY ROAD | HTML, CSS, JAVASCRIPT

- Five member sprint to build a single-page application that would allow users to build itineraries for their trips to national parks
- Responsible for implementing external OpenWeather API for showing 5 day forecast of the selected park

NUTSHELL | HTML, CSS, JAVASCRIPT

- Five member sprint to build a single-page application that would allow users to save tasks, articles, events, and share them with other users
- Responsible for CRUD functionality of events section and how it renders depending on user relationships

DIGITAL MARKETING ASSOCIATE

DOT FM GROUP | DEC 2017 - FEB 2019

Digital media agency specializing in lead generation and content creation

- Created and scheduled daily content, including images, videos and blog posts
- Produced 20 episodes of Sunday at Sunnybrook on YouToo America and 10 episodes of World Changers with Jamie Osborne on BizTV.
