PROJECTS

PETS PLEASE | REACT

Pet's Please is a single page application that allows users to save pictures of their pets to view on a main social media feed. Users can follow other users to tailor their main feed. Customize your experience by following good pet photographers and using the ability to filter by animal type.

- Built in React using JSON server, with full CRUD functionality to store user and pet information
- Photos stored using Cloudinary's image services

GITHUB.COM/JAYSONRICE/PETS-PLEASE

FRAME ADVANCE | C# | REACT

Frame Advance is an application built for competitive people who want to review footage of past games in order to improve. Users can create a post with a YouTube link, create timestamps, and leave notes about what they did wrong. Users can find other players' reviews to learn from more advanced players. Users will then have a database of notes with video reference to succeed in their game of choice.

- Built using C#, ASP.NET Core, SQL Server, React, and styled with Reactstrap

EDUCATION

NASHVILLE SOFTWARE SCHOOL
FULL-STACK SOFTWARE DEVELOPER

MIDDLE TENNESSEE STATE UNIVERSITY
B.S., DIGITAL MEDIA

ABOUT ME

Coming from a digital marketing background, I knew that I really enjoyed being creative and problem solving more than generating clicks. My only experience with web development before Nashville Software School was building Wordpress sites for clients. Creating websites inspired me to delve into software development when it came time to change careers. It's been an exciting journey so far, and I can't wait to see what it brings!

TECHNICAL EDUCATION

JUNIOR SOFTWARE DEVELOPER

NASHVILLE SOFTWARE SCHOOL | FEB 2020 - AUG 2020
Intensive full-time 6 month software development bootcamp focusing on full-stack (C#/.NET) development fundamentals and problem solving

- Build single page applications using HTML, CSS, JavaScript, and React
- Create CRUD functional applications
- Experienced working on individual projects as well as working with teams remotely on group projects
- Source code version control with Git / GitHub

GROUP PROJECTS

HOLIDAY ROAD | HTML, CSS, JAVASCRIPT

- Five member sprint to build a single-page application that allowed users to build itineraries for trips to national parks
- Responsible for implementing external OpenWeather API for showing 5 day forecast of the selected park

NUTSHELL | HTML, CSS, JAVASCRIPT

- Five member sprint to build a single-page application that allows users to save tasks, articles, events, to share
- Responsible for CRUD functionality of events section and how it renders depending on user relationships

TABLOID | C#, .NET, SQL, REACT

- Four member sprint to build a fullstack blogging platform with posts, categories, and tags, all with admin vs author privileges
- Emphasis on working as a team in a remote environment
- Responsible for CRUD functionality of categories and implementing the ability to add tags and reactions to posts

PROFESSIONAL EXPERIENCE

DIGITAL MARKETING ASSOCIATE

DOT FM GROUP | DEC 2017 - FEB 2019
Digital media agency specializing in lead generation and content creation

- Worked in collaboration with manager to develop marketing content for Robert Schuller Ministries, Honey Do Service, Tan 2000, ALuxuryLimo, and Red Rooster Bakery
- Ran Facebook Ad campaigns and tracked interaction
- Produced 20 episodes of Sunday at Sunnybrook on YouToo America and 10 episodes of World Changers with Jamie Osborne on BizTV.
- Gained proficiency with Adobe Suite software such as Illustrator, Premiere, and Photoshop
