SUMMARY

Full-stack C#/.NET and React developer with 5+ years of remote experience in healthcare software, focused on Twilio voice systems. Builds with Claude Code using an investigate, plan, implement, validate workflow.

EXPERIENCE

WellSky (formerly Sleep Solutions and Services) Apr 2021 – Present
Associate Software Developer · Remote

- Built and extended a C# Twilio IVR handling **~64,000 patient calls a day** for CPAP supply reorders: TwiML webhooks, patient verification, insurance eligibility filtering, mid-call address changes, and routing to live agents
- Led our integration with an external **AI voice platform**: our app sent patient data to start each call and turned the results into orders, tasks, and contact updates across **thousands of live patient calls**
- Built a React dashboard that scores every connected coach call (**6,000+ a day**) against the questions a standard resupply call should cover, using AI analysis from the same platform
- Built React/Redux dashboards for coaches and admins (scheduling, company stats, call-ratio charts, IVR call history, autodialer filters) and moved expensive totals to on-demand loading to end slow initial page loads
- Shipped urgent changes for the June 2021 Philips CPAP recall, blocking orders for recalled devices and adding recall alerts to the patient portal
- Built Outreach Manager, a standalone .NET Core app with a no-code form builder for IVR question campaigns and Twilio calling with retry logic; still in use by partner companies
- Deployed releases through multi-stage Azure Pipelines (Dev, QA, Stage, Production), managing configuration and secrets in the variable library and using feature flags for controlled rollouts

PROJECTS

Native Plant Swap Sep 2026 – Present
C#, .NET, PostgreSQL, React, TypeScript · native-plant-swap-production.up.railway.app

- Map-first app that shows your ecoregion, the native plants recorded near you, and the wildlife they support; built end to end with Claude Code and deployed on Railway with Docker
- ASP.NET Core API and Entity Framework Core on PostgreSQL, with a React + TypeScript front end
- .NET import tool that combines public USDA, EPA, and Census data, works out which ecoregions each county falls in, and bulk-loads the results into PostgreSQL

Frame Advance 2020
C#, ASP.NET Core, EF Core, SQL Server, React · github.com/JaysonRice/FrameAdvance

- Full-stack app for competitive gamers to timestamp and annotate YouTube match footage

SKILLS

Languages & frameworks: C#, ASP.NET Core, Entity Framework Core, LINQ, React, Redux, TypeScript, JavaScript, HTML/CSS
Data: SQL Server, PostgreSQL
Integrations & cloud: Twilio (Voice / TwiML), Azure DevOps Pipelines, Docker, ngrok
Tools & practices: Claude Code, Git / GitHub, LINQPad, Postman, Agile / Scrum, code review, Photoshop

EDUCATION

Nashville Software School · Certificate, Software Development 2020
Middle Tennessee State University · B.S., Digital Media 2017
